

A 2-piece stainless steel tank valve tested and proven to 5000 psi. Laboratory and independent FEA design conformation. Anti-blow-out stem design with top bearing ensures continual reliable performance. Ideally suited for use in and around CNG transportation units, all Sweet Natural Gas, inert and non-corrosive gas applications. Manufactured and designed in accordance to ISO 9001/2008.

Operation:

MAWP 5000 psi (345 bar)
 Temperature - 40°C to 80°C (Based on standard seals)

Port Connections:

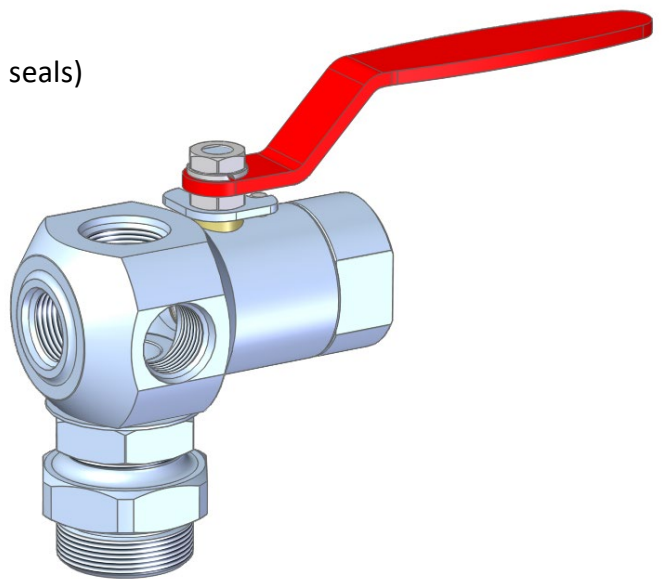

NPT (std) (N)
 SAE (S)
 BSPP (B)

Features:

- Tested to 4:1 safety factor
- Anti- blow-out stem
- Bi-directional
- Delrin AF seats as standard
- Low torque operation
- Floating ball principle
- Multiple handle configurations
- Machined threaded port connections
- Fully serviceable, all kits available

Materials:

Body 304 Stainless Steel
 End Caps 304 Stainless Steel
 Ball 304 Stainless Steel
 Stem 304 Stainless Steel
 Seats Delrin AF Standard
 O' Rings Nitrile
 Handle 304 Stainless Steel
